PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in Java backend development, specializing in Spring Boot, Microservices, RESTful APIs, Spring Security, Hibernate/JPA, MySQL, and MongoDB. Experienced in designing secure, scalable enterprise applications, developing production-ready APIs, integrating third-party systems, and supporting large-scale SaaS products. Strong foundation in Core Java, clean architecture, Agile development, code reviews, production support, and client collaboration.

TECHNICAL SKILLS

Languages: Java 8, SQL

Backend: Spring Boot 3, Spring MVC, Spring Security, REST APIs, Microservices, Hibernate, Spring Data JPA, JDBC

Databases: MySQL, MongoDB

Build & Tools: Maven, Git, Bitbucket, Jira, Postman, Swagger

Security: JWT Authentication, Role-Based Access Control (RBAC)

Core Java: OOP, Collections, Exception Handling, Multithreading, Streams, Lambda Expressions, Design Patterns, SOLID Principles

Practices: Agile Scrum, SDLC, Code Reviews, API Integration, Production Support

PROFESSIONAL EXPERIENCE

Software Engineer, NextRow DigitalMar 2024 – Present

- Developed and maintained scalable backend applications using Java 8, Spring Boot 3, and Microservices architecture.
- Designed, developed, and enhanced 12 RESTful APIs supporting enterprise SaaS applications and client requirements.
- Implemented secure authentication and authorization using Spring Security and JWT-based mechanisms.
- Built new backend modules, metadata services, and API integrations while collaborating with cross-functional teams.
- Designed and optimized database operations using Hibernate/JPA with MySQL and MongoDB.
- Performed production support, root cause analysis, and critical bug fixes to maintain application reliability.
- Participated in code reviews, sprint planning, and Agile ceremonies to improve code quality and delivery.
- Worked directly with clients and internal stakeholders to gather requirements, provide technical solutions, and ensure successful feature delivery.
- Received a Performance Appreciation award for leadership, team collaboration, and client interaction.

ENTERPRISE PROJECT EXPERIENCE

QuipTag – Intelligent Metadata & Analytics Tagging Platform

- Contributed to QuipTag, an enterprise SaaS platform automating metadata tagging and analytics implementation for digital experiences.
- Developed backend APIs and metadata services using Java and Spring Boot to support scalable content-tagging workflows.
- Implemented authentication, database enhancements, API integrations, and new feature development.
- Resolved production issues, delivered enhancements, and maintained high-quality backend services throughout the project lifecycle.
- Supported integration with Adobe Experience Manager (AEM) and Adobe Analytics platforms to streamline metadata tagging and reduce manual authoring effort.

PERSONAL PROJECT

KBR Sphere – Real Estate Microservices Platform

- Developing a full-stack real estate platform using Spring Boot Microservices.
- Designed User, Property, Booking, Payment, Review, and Maintenance services.
- Implemented JWT authentication, Spring Security, MySQL, MongoDB, Swagger, and Docker-based architecture.
- Followed clean architecture, DTO mapping, global exception handling, and scalable REST API design.

CERTIFICATIONS

Java Full Stack Development Certification

Completed professional training covering Core Java, Advanced Java, JDBC, Servlets, JSP, Spring Framework, Spring Boot, Hibernate, REST APIs, SQL, HTML, CSS, and JavaScript.

EDUCATION

B.Tech in Mechanical Engineering

Avanthi Institute of Engineering and Technology, Vizianagaram
